

1. Place the Drive Firmware Disc in the top drive. Make sure your top drive is listed as the source drive.

```
Src: DVD-DUAL  
01 IDE1 Master
```

2. Then hold down the **ESC** button and the machine will beep and the display will read 12- 01. ADV SETUP

```
12-01.ADV Setup  
UnderRun Protect
```

3. Use the down Arrow  to 12-16 drive firmware press **ENT**.

```
12-16.Setup  
Update Drive F/W
```

4. It will ask if you want to upgrade to 1.07 press **ENT** for yes then it will ask you if you want to upgrade all the drives press **ENT**.
The firmware will update for after it is finishing updating all the drive power off the machine and power it back on and test it.
