PROVIDING SOLUTIONS AND STRATEGIES FOR TODAY'S CHURCHES

## Multiply DVDs with the Greatest of Ease

Disc Makers' Elite series of CD and DVD duplication and printing systems makes it easy for any ministry to transition from sermons on cassette to newer, more popular CD and DVD formats. The technology to record and reproduce CDs and DVDs—previously only available to production studios and large corporations—is now offered to churches at an affordable price.

One example is the Disc Makers ElitePro1, featuring a built-in Intel-based PC, including a monitor, keyboard and mouse. The system includes Padus DiscJuggler software, which provides a user-friendly interface to simplify data, audio, video and DVD duplication. Available with one 48x CD-R drive or one 4X DVD-R drive, the ElitePro1 duplicates and prints at least 17 CD-Rs, or 4 DVD-Rs, per hour. The input bin holds up to 125 discs for larger-capacity duplication projects, and the system can easily be upgraded to keep up with the newest technology.
